

Male Life Expectancy at Birth, in Communities Across Norfolk (2016-2020)

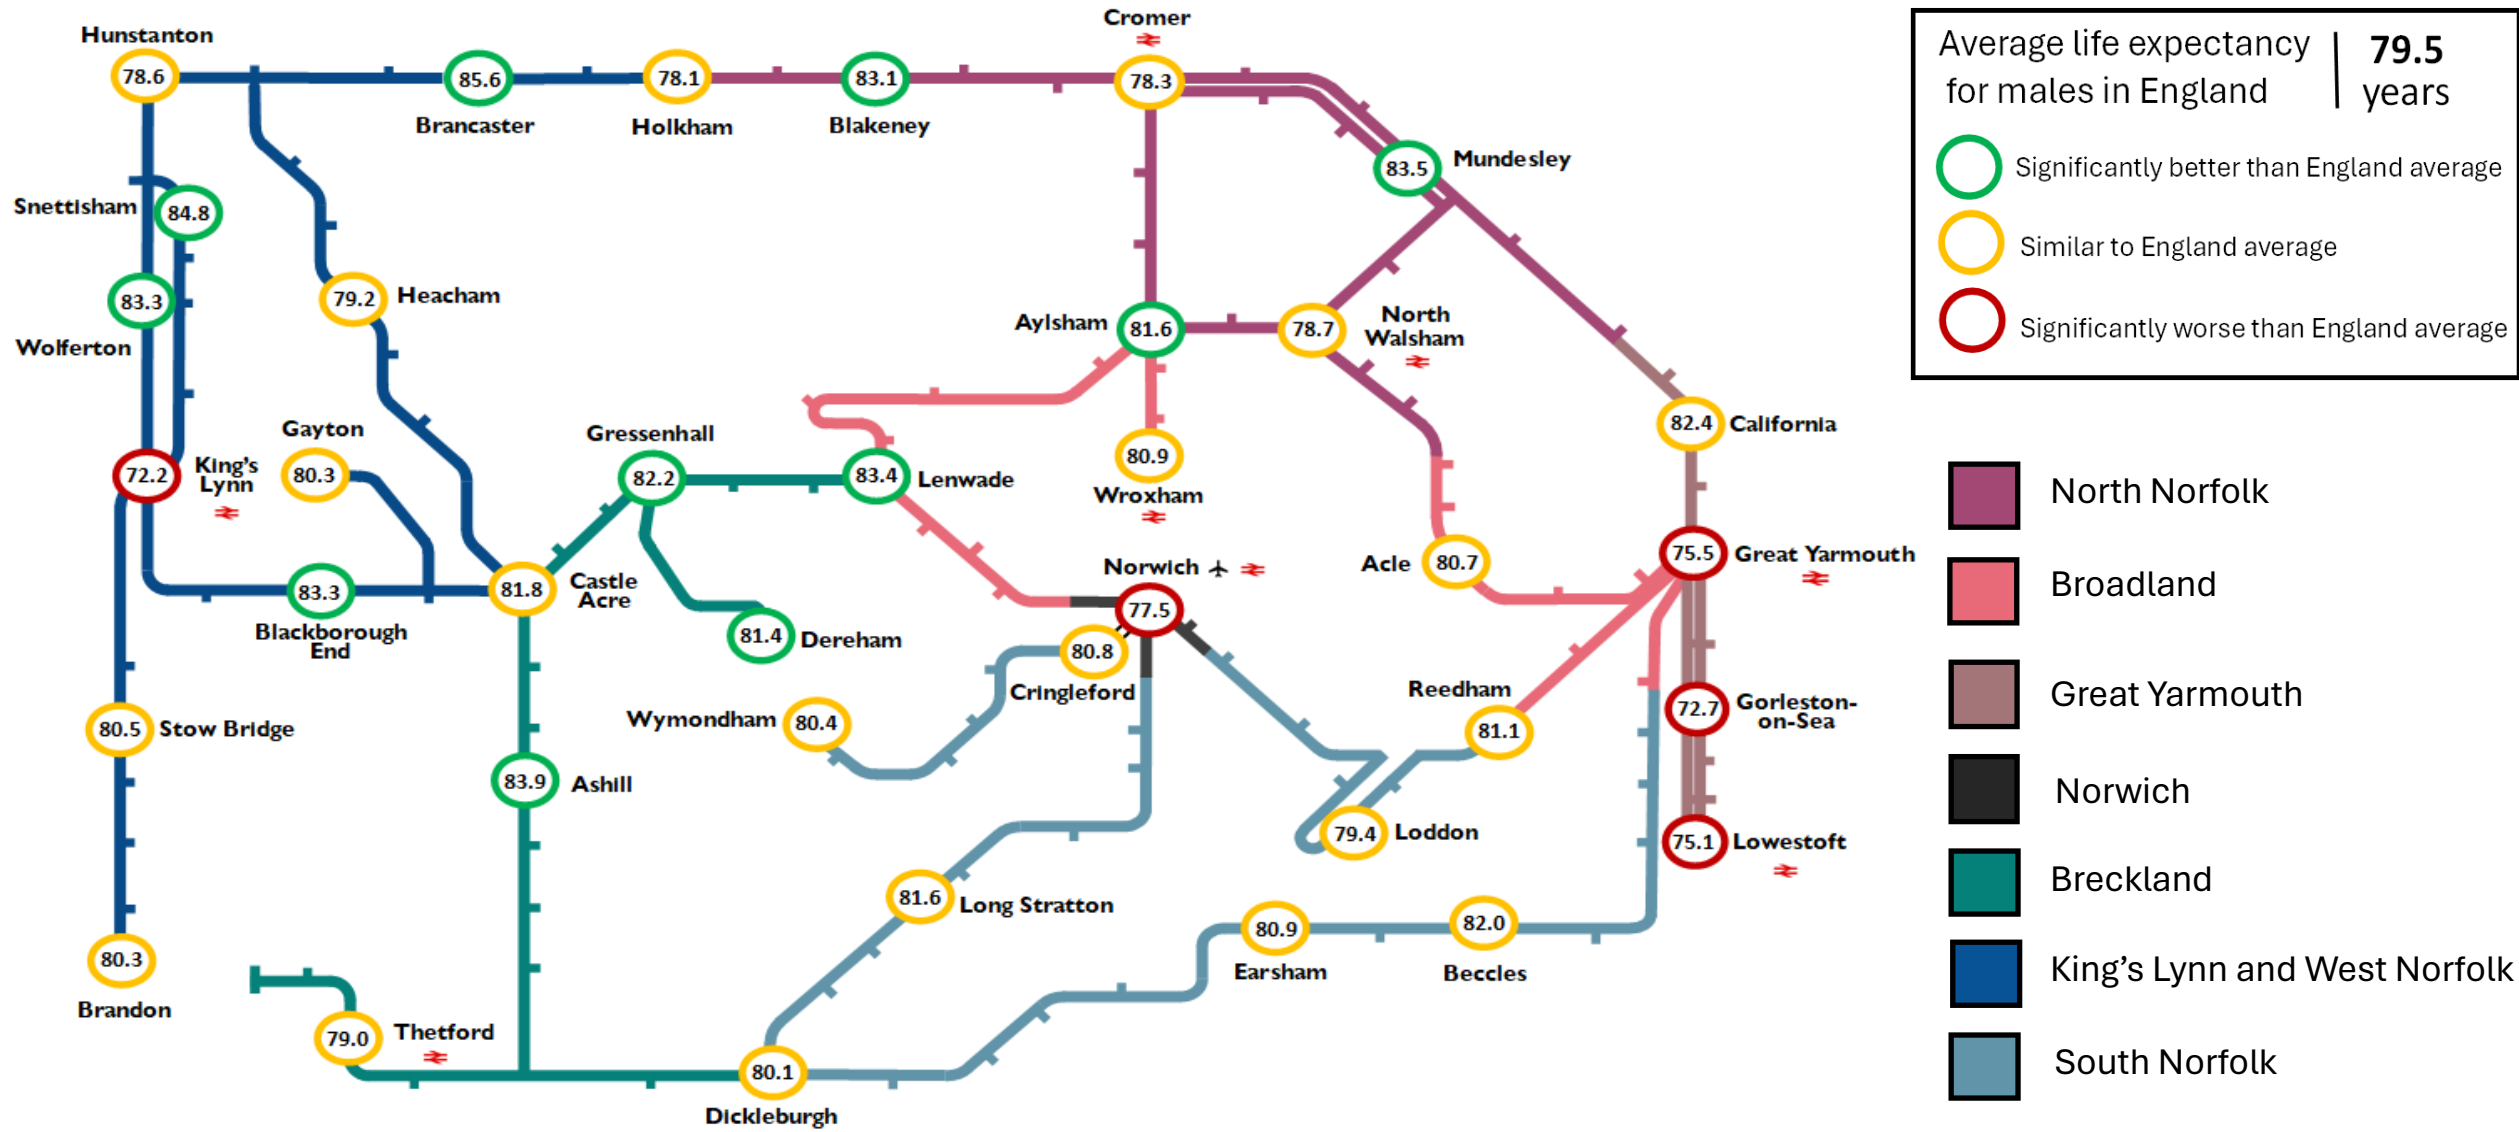

Figure 1. Comparison of male life expectancy at birth, in communities across Norfolk (2016-2020). For each community, life expectancy data for the electoral ward with the largest estimated resident population was obtained from OHID. Coloured circles indicate whether life expectancy for each electoral ward varied significantly from the national average for England. Coloured routes align with the seven districts of Norfolk. Map reproduced with thanks to Norfolk Trails.
