

# Mental Health Needs Assessment West Norfolk CCG

**August 2013**

**Dr Kadhim Alabady, Principal Epidemiologist**

# Aim

**The aims of the mental health needs assessment are:**

- To gather information to plan, negotiate and change services for the better and to improve health in other ways.
- To build a picture of current services, i.e. a baseline.
- To encourage discussion on why might services need changing for the better?

# Objectives

**The objectives of the mental health needs assessment are:**

**Planning:**

The main objective of mental health needs assessment is to help decide what services are required i.e. for how many people, the effectiveness of these services, the benefits that will be expected, and at what cost.

**Intelligence:**

Provide a baseline of current picture of mental health in Norfolk and Waveney which can then be used to measure the impact of interventions or service development.

**Equity:**

Reduce health inequalities through early identification and improving the spatial allocation of resources between and within different groups.

**Efficiency:**

Having assessed needs, measuring whether or not resources have been appropriately directed i.e. Do those who need a service get it? Do those who get a service need it? This is related to audit.

**Involvement of stakeholders:**

Conducting out the mental health needs assessment can stimulate the involvement and ownership of the various stakeholders in the process.

## Chapter 1: GP QOF Mental Health Prevalence, and Incapacity Benefit

- GP Practice QOF registers
  - Serious mental illness
  - Dementia
  - Depression (18+ Years)
- Incapacity Benefit

## Chapter 1: GP QOF Mental Health Prevalence

- Prevalence (%) of serious mental illness (all ages) according to the GP's QOF registers by CCG, for 2007/08 – 2010/11 (unadjusted for age or gender)

The rate of diagnosed severe mental illness on GP QOF registers for West CCG is six per thousand (0.6% of all ages), lower to NHS Norfolk average rate and England.

CCG	2007/8	2008/9	2009/10	2010/11
GY&W	0.7	0.8	0.8	0.8
North	0.7	0.8	0.8	0.8
Norwich	1	1	1.1	1.1
South	0.5	0.6	0.6	0.6
<b>West</b>	<b>0.6</b>	<b>0.6</b>	<b>0.6</b>	<b>0.6</b>
NHS Norfolk & Waveney	0.7	0.8	0.8	0.8
East of England	0.7	0.7	0.7	0.7
England	0.7	0.7	0.8	0.8

- Prevalence (%) of dementia (all ages) according to the GP's QOF registers by CCG, for 2007/08 – 2010/11 (unadjusted for age or gender)

The proportion of the local practice populations diagnosed with dementia is equal for West CCG at five per thousand, than seen either nationally or at regional level.

CCG	2007/8	2008/9	2009/10	2010/11
GY&W	0.6	0.6	0.7	0.7
North	0.6	0.6	0.6	0.7
Norwich	0.4	0.5	0.5	0.5
South	0.5	0.5	0.6	0.6
<b>West</b>	<b>0.5</b>	<b>0.5</b>	<b>0.5</b>	<b>0.5</b>
NHS Norfolk & Waveney	0.5	0.5	0.6	0.6
East of England	0.4	0.4	0.5	0.5
England	0.4	0.4	0.5	0.5

## Chapter 1: Prevalence of depression (18+ years of age)

- **Prevalence (%) of depression (18+ years of age) according to the GP's QOF registers by CCG, for 2009/10 – 2010/11 (unadjusted for age or gender)**

The proportion of the local practice populations diagnosed with depression for West CCG is 12.5 per hundred, the highest in the county and greater than either nationally or at regional level.

CCG	2009/10	2010/11
GY&W	14.5	14.8
North Norfolk	11.8	12.4
Norwich	9.6	9.7
South Norfolk	11.6	11.7
<b>West Norfolk</b>	<b>12.4</b>	<b>12.5</b>
NHS Norfolk and Waveney	12.1	12.3
East of England	10.4	10.9
England	10.9	11.2

## Chapter 1: West Norfolk QOF (summary)

- **Serious mental illness prevalence**
  - Over four years the rate is Static (0.6% 2007/08 - 2010/11).
  - 0.2% (1 practices) to 1% (1 practice).
  - 16 out of 24 (70%) practices 0.5-.9%.
- **Dementia (18+)**
  - Over four years the rate is Static (0.5% 2007/08 - 2010/11).
  - The rate varies between 0.2-2%.
  - 21 out of 23 practices registered < 1% (91%) practices.
- **Depression**
  - Over two years the rate is increased from 12.4% in 2009/10 to 12.5% in 2010/11.
  - The rate varies between 0.3-24%.
  - 9 (39%) practices had registered depression <10 (of which 2 practices registered depression below 1%), while 14 (61%) practices registered depression > 10 (**13 of these 14 practices registered depression more the CCG average rate 12.5%**).

## Chapter 1: Incapacity Benefit (IB)

- **Number (and rate per 100 working-age population) of claimants of Incapacity Benefit and Severe Disablement Allowance by local authority, February 2012**

In February 2012, there were **1,530** people claiming incapacity benefit across West Norfolk due to mental illness, **41%** of all claimants and a rate of **1.8%** of working age adults (Aged 16-64 years for men and 16-59 years for women estimated from ONS mid 2011 estimate file).

LA	IMD 2010		Number		Mental Health claimants	
	Score	Rank	Mental Health claimants	All claimants	% of all claimants	Rate per 100 working-age population
Breckland	15.91	187	1,095	2,625	41.7	1.5
Broadland	10.41	279	975	2,230	43.7	1.4
Great Yarmouth	27.66	54	1,345	3,240	41.5	2.4
<b>King's Lynn &amp; West Norfolk</b>	<b>21.05</b>	<b>123</b>	<b>1,530</b>	<b>3,720</b>	<b>41.1</b>	<b>1.8</b>
North Norfolk	19.28	146	1,040	2,420	43.0	2.0
Norwich	25.65	70	2,505	4,360	57.5	2.8
South Norfolk	11.31	259	930	2,075	44.8	1.3
Waveney	22.08	115	1,175	3,015	39.0	1.8
Norfolk			9,420	20,670	45.6	1.9
Norfolk and Waveney			10,595	23,685	44.7	1.9

## Chapter 1: Incapacity Benefit (IB)

- 4<sup>th</sup> highest in the county, slightly lower level than Norfolk average rate.
- Need to assess their mental health conditions, to ensure access to mental health services (data is available at individual level).
- There were 3 wards from King's Lynn and West Norfolk amongst the 10<sup>th</sup> highest wards in the county for those who claim incapacity due to mental illnesses, and these are: North Lynn (3.5%), Downham Old Town (3.6%), St Margarets with St Nicholas (5.8%).

## Chapter 2: Estimated mental ill health within NHS Norfolk and Waveney

- Adult
- Children
- Eating Disorders

## Chapter 2: Adults (Estimated numbers adults aged 16-74 years with mental illness by applying survey data)

- Estimated number of people with mental health disorders for those aged 16-74 years of age by gender and CCG (based on rates calculated from McManus et al survey, 2009), 2011/12

	GY&W	North Norfolk	Norwich	South Norfolk	West Norfolk	NHS Norfolk and Waveney
Total (males and females)						
Common mental disorder (past week)	26,787	19,430	24,480	25,473	18,742	114,911
Current post traumatic stress disorder	4,914	3,556	4,489	4,662	3,428	21,048
Suicidal thoughts (past year)	7,156	5,189	6,539	6,802	5,004	30,689

Two or more psychiatric disorders	12,002	8,671	10,961	11,369	8,357	51,358

## Chapter 2: Adults (aged 16-74) Depressive episode and neurotic disorder

- Estimated number of adults aged 16-74 years with neurotic disorders following clinical interview, using national prevalence applied to local West Norfolk Clinical Commissioning Group (CCG) population figures:
- **10,300** Mixed anxiety/depression disorder
- **5,200** Generalised anxiety disorder
- **3,000** Depressive episode
- **2,000** All phobias
- **1,300** Obsessive compulsive disorder
- **800** panic disorder
- **19,100** Any neurotic disorder

	Rates per 1,000 in past week by age (people may have more than one disorder)					
	GY&W	North	Norwich	South	West	Norfolk & Waveney
Persons						
Mixed anxiety/depression disorder	14,800	10,700	13,600	13,900	<b>10,300</b>	63,100

Depressive episode	4,300	3,100	4,000	4,000	<b>3,000</b>	18,300
All phobias	2,900	2,100	2,700	2,800	<b>2,000</b>	12,500
Obsessive compulsive disorder	1,900	1,300	1,700	1,700	<b>1,300</b>	7,900
panic disorder	1,200	800	1,000	1,100	<b>800</b>	5,000
Any neurotic disorder	27,600	19,900	25,400	26,000	<b>19,100</b>	118,100

## Chapter 2: Expected number of adults aged 16-74 years with personality disorder(s)

- Expected number of adults aged 16-74 years with personality disorder(s) if the national rates are applied to West Norfolk CCG populations

It is estimated **5,100** aged 16-74 years with personality disorder(s) of which 1,100 among (16-34) age group, 1,800 among (35-54) age group, 2,500 among (55-74) age group.

	Personality disorder, rates per 1,000 by age (years)			
	16-34	35-54	55-74	16-74
<b>Males</b>	52	58	53	54
<b>Females</b>	17	29	63	34

	16-34	35-54	55-74	16-74
<b>Total (males and females)</b>				
<b>GY&amp;W</b>	1,700	2,700	3,400	7,400
<b>North Norfolk</b>	1,000	1,800	2,900	5,300
<b>Norwich</b>	2,100	2,300	2,200	6,800
<b>South Norfolk</b>	1,500	2,600	3,100	6,900

<b>NHS Norfolk &amp; Waveney</b>	<b>7,400</b>	<b>11,400</b>	<b>14,100</b>	<b>31,500</b>

## Chapter 2: Adult (aged 16-74 years) Attention-Deficit Hyperactivity Disorder (ADHD)

- Estimated number of adults aged 16-74 years with ADHD (national prevalence applied to local Clinical Commissioning Group CCG population figures)

For adults with ADHD disorder, we have used national survey figures and applied it locally ; assuming **3%-4%** adults aged 16 - 74 were affected, there were around **3,480-4,639** cases across West Norfolk CCG in 2011.

	3%			4%		
	Males	Females	Persons	Males	Females	Persons
<b>GY&amp;W</b>	2,528	2,475	5,003	3,370	3,301	6,671
<b>North Norfolk</b>	1,784	1,827	3,611	2,378	2,436	4,814
<b>Norwich</b>	2,299	2,269	4,568	3,066	3,025	6,091
<b>South Norfolk</b>	2,341	2,394	4,735	3,121	3,192	6,313
<b>West Norfolk</b>	<b>1,713</b>	<b>1,767</b>	<b>3,480</b>	<b>2,283</b>	<b>2,356</b>	<b>4,639</b>
<b>NHS Norfolk and Waveney</b>	10,664	10,733	21,397	14,219	14,310	28,529

## Chapter 2: Adult (aged 18-64 years) Autism Spectrum Conditions

- Expected number of people aged 18-64 with Autism Spectrum Conditions by CCG and age band, 2011
- For adults with autistic spectrum disorder, we have used data from our previous work in 2012 ; assuming 1% adults aged 16 - 64 were affected, there were just over **939** cases across West Norfolk CCG in 2011, about four fifths being male.

	18-24	25-34	35-44	45-54	55-64	18-64

## Chapter 2: Mental and Behavioural disorder among Children

- **Numbers of children that would have had mental disorders in West Norfolk CCG in 2011/12, based on National survey data from 2004 (Green et al 2005)**

The most recent population prevalence estimates of mental disorders in children aged 5 - 16 years were calculated from a national survey conducted in 2004. Applied to the population of West Norfolk in 2010/11, about **1,922** children in West Norfolk CCG would have been affected with conditions ranging from anxiety and depression, conduct disorders and hyperkinetic disorder, to the less common ones including autistic spectrum disorder, tic disorders, eating disorders and mutism.

Type of mental disorder (ICD 10)	Aged 5-10 years		Aged 11-16 years	
	Boys	Girls	Boys	Girls
<b>Emotional disorders</b>	108	115	209	313
- Anxiety disorders	103	111	188	267
- Depression	10	14	52	97
<b>Conduct disorders</b>	339	129	423	338
<b>Hyperkinetic disorder</b>	133	18	125	21
<b>Less common disorders*</b>	108	18	84	56
<b>Any disorder</b>	<b>501</b>	<b>235</b>	<b>658</b>	<b>528</b>

## Chapter 2: Attention-Deficit Hyperactivity Disorder (ADHD) among children aged 0-16

- **Estimated numbers of Attention-Deficit Hyperactivity Disorder (ADHD) aged 0-16 within West Norfolk CCG, 2011/12**

For Attention-Deficit Hyperactivity Disorder (ADHD), prevalence in school children is 3 - 5%: **839 – 1,398** children in West Norfolk CCG.

ADHD 0-16	ADHD 0-16	
	LL	UL
GY&W	1,253	2,089
North Norfolk	814	1,356
Norwich	1,080	1,800
South Norfolk	1,224	2,040
<b>West Norfolk</b>	<b>839</b>	<b>1,398</b>
NHS Norfolk and Waveney	5,209	8,682

## Chapter 2: Autism and Autistic Spectrum Disorders among children aged 0-19

- **Estimated numbers of Autism and Autistic Spectrum Disorders aged 0-19 within West Norfolk CCG, 2011/12**

For Autistic Spectrum disorder, there may be **200** children to age 19, exceeding the estimates for 'classic' autism alone, which would that between **12** and **24** children would be affected in West Norfolk CCG.

Autism and Autistic Spectrum Disorders 0-19	Autism estimates		Autistic spectrum disorder estimates

## Chapter 2: Anorexia Nervosa

- **Estimated numbers of Anorexia Nervosa aged 15-30 and all ages within Norfolk and Waveney by CCG, 2011/12**

**MIND** – a charity for better mental health, states that **1 in 100 women aged between 15 and 30**, suffers from anorexia

**Beat** – Beating eating disorders suggests that Approximately **11 people in 100,000** develop anorexia nervosa each year.

For anorexia nervosa, among young women aged 15 - 30, we estimated **126** sufferers, and across all sexes and ages, **18** new cases per year for West Norfolk CCG.

CCG	Estimated number of girls ages 15-30 with anorexia nervosa	Estimated number of people develop anorexia nervosa each year – all ages
GY&W	192	25

## Chapter 2: Eating Disorder Not Otherwise Specified (EDNOS)

- **Estimated numbers of residents with EDNOS in Norfolk and Waveney 2011/12 at risk of EDNOS at some point in their life by CCG**

The National Eating Disorders Association of the US states that **4-6% of the general population** develops an EDNOS at some point in their life, and 50% of individuals who present for treatment of an eating disorder receive the diagnosis of EDNOS.

For an eating disorder 'not otherwise specified', a much higher proportion of people are affected, accounting for 50% of people who present for treatment, we estimated **6,431-9,646** people in West Norfolk CCG population have EDNOS.

CCG	Estimated numbers of residents with EDNOS in Norfolk and Waveney 2011/12 at risk of EDNOS at some point in their life	
	4%	6%
GY&W	9,233	13,849

NHS Norfolk and Waveney	39,231	58,846

## Chapter 3: Projecting Adult Needs and Service Information System (PANSI)

- Common mental health, personality, and psychotic disorders prevalence, 2012-2030
- All ages, estimated mental illness - conditions for NHS Norfolk and Waveney by gender, 2012-2030

## Chapter 3: Common mental health, personality, and psychotic disorders prevalence, 2012-2030

	Persons					Estimated increase mental health conditions from 2012-2030		
	2012	2015	2020	2025	2030	Males	Females	Persons
Dementia	2881	3103	3617	4231	4941	923	1137	2060
Autistic Spectrum	1659	1703	1779	1856	1925	131	135	266
Depression	4239	4350	4544	4741	4919	303	377	680
Neurotic Disorder	27391	28111	29362	30633	31781	1777	2613	4390
Personality Disorder	7263	7456	7791	8129	8432	711	458	1169
Psychotic Disorder	911	934	976	1019	1057	79	67	146
Alcohol Dependence	5186	5350	5615	5863	6124	695	243	938
Illicit Drug Dependence	4871	5026	5275	5507	5753	626	256	882

The estimated increase mental illness – conditions in West Norfolk CCG from 2012 to 2030 is:

- Dementia **2050** (males 923, females 1137)
- Autistic Spectrum **256** (males 131, females 135)
- Depression **680** (males 303, females 337)
- Neurotic Disorder **4390** (males 1777, females 2513)
- Personality Disorder **1169** (males 711, females 458)
- Psychotic Disorder **145** (males 79, females 67)
- Alcohol Dependence **938** (males 695, females 243)
- Illicit Drug Dependence **882** (males 626, females 256)

## Chapter 4: National Mental Health Minimum Dataset (MHMDS)

- Service data from the National Mental Health Minimum Data Set (MHMDS ) and from local reporting

## Chapter 4: National Mental Health Minimum Dataset (MHMDS)

- **Mental health services referral (First time and all referrals) by CCG for NHS Norfolk and Waveney, 2011/12**

In 2011/12, 3,268 people resident in West Norfolk were referred to mental health services, some more than once, such that there were 4,742 episodes of care, of which just over half were for females.

	GY&W	North Norfolk	Norwich	South Norfolk	West Norfolk	Missing	NHSN&W

## Chapter 4: National Mental Health Minimum Dataset (MHMDS)

- **32%** of referrals were from GY&W CCG, 13.6% from North Norfolk CCG, 20.1% from Norwich CCG, 16% from South Norfolk CCG, **13.6%** from **West Norfolk CCG**.
- The rate of referrals per 1000 persons were higher in GY&W 3.3 per 100, compared to 2 per 100 in North Norfolk CCG, 2.3 per 100 in Norwich, 1.7 per 100 in South CCG, **2** per 100 in **West Norfolk**.

## Chapter 4: People characteristics and mental health specialist services for West Norfolk CCG, 2011/12

- 73.2% were white, while 25.2% Not known or not specified or not stated or missing
- 57% were females and 43% are males
- 60.5% referred through GPs, and 39.4 through others
- Most common source of referrals apart from GPs were A&E 39.4 Clinical source 27.6% , %, Self-Referral 13.4%.

## **Chapter 5 (Hospital admissions) over two years April 2010 – March 2012, Norfolk and Waveney**

- Admission to a District General Hospital - excluding mental health unit

## Chapter 5: Inpatient admissions in Norfolk and Waveney (‘Not including psychiatric hospital’)

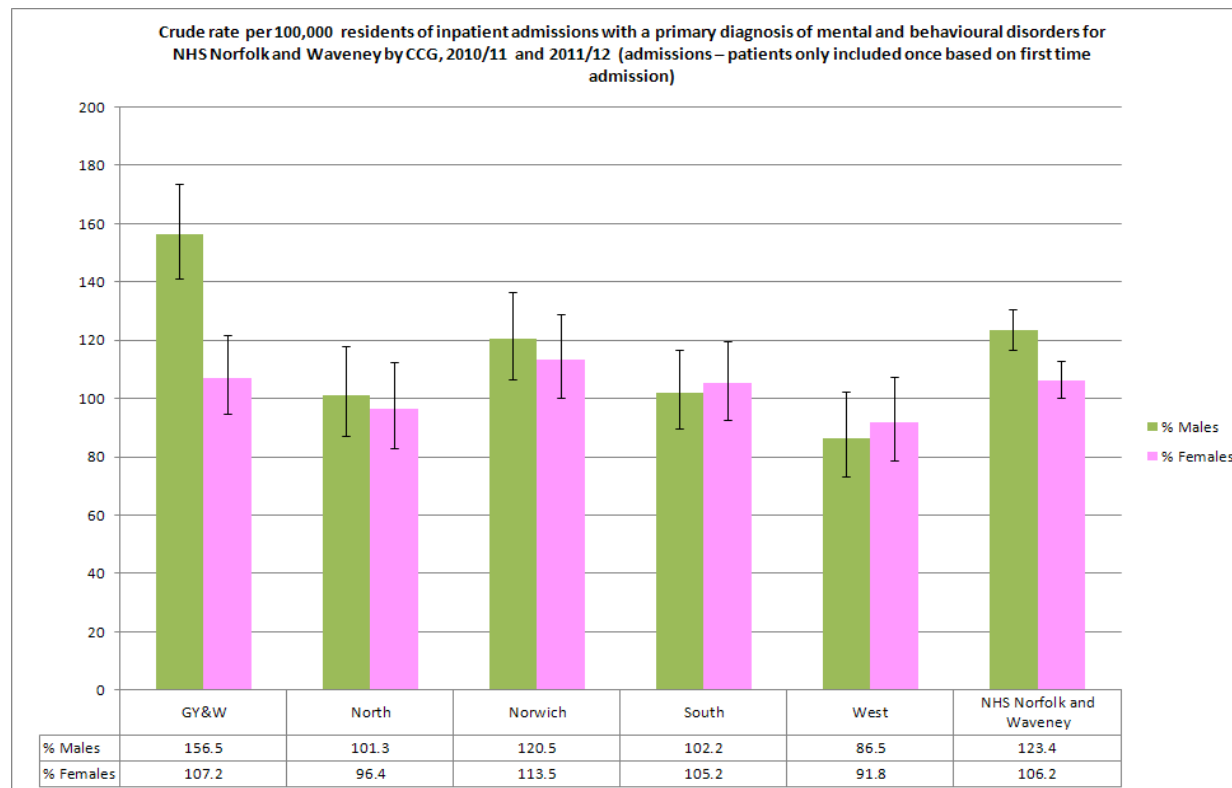

- **Number of inpatient admissions with a primary diagnosis of mental and behavioural disorders for NHS Norfolk and Waveney by CCG, 2010/11 and 2011/12**

There were **350** admissions recorded over the two years in West Norfolk CCG, of which 188 (53.7%) were males and 162 (46.3%) females. Some admissions could be the same person being admitted on more than once in the reporting period.

CCG	All admissions			First time admissions		
	Males	Females	persons	Males	Females	persons
GY&W	527	360	887	359	249	608

<b>Total</b>	<b>1,562</b>	<b>1,255</b>	<b>2,817</b>	<b>1,204</b>	<b>1,066</b>	<b>2,270</b>

- **Crude rate per 100,000 residents for first time inpatient admission with a primary diagnosis of mental and behavioural disorders, by CCG in NHS Norfolk and Waveney 2010/11 and 2011/12**

West Norfolk CCG has lower hospital admission rate (not statistically significantly ) for residents with a primary diagnosis of mental and behavioural disorders during 2010/11 and 2011/12.

## Chapter 5: (Hospital admissions) over two years April 2010 – March 2012, West Norfolk

- The most common reason for someone to be admitted was for mental and behavioural disorders due to psychoactive substance abuse, accounting for **130 (44%)** people.
- A further **45 (15.4%)** were admitted with neurotic, stress-related and somatoform disorders.
- and **33 (11.3%)** people were admitted on account of their dementia.
- **27 (9.2%)** people were admitted with mood disorders and **10 (3%)** with schizophrenia, schizotypal and delusional disorders.
- **20 (6.8%)** people were admitted with 'other organic, including symptomatic, mental disorders'
- and **21 (7.2%)** people were admitted with behavioural syndromes associated with physiological disturbances and physical factors.

	Number			%		
	Males	Females	Persons	Males	Females	Persons

## Chapter 5: Inpatient admissions in West Norfolk (‘Not including psychiatric hospital’)

- Among men, admissions become more common with increasing age, rising slowly to a peak among 50 - 64 year olds. Then they drop slightly, followed by a sharp rise among men over the age of 75.
- The pattern for women is different, as they are more likely than men to be admitted when they are below the age of 30. However, the rate increased among 40-69 years old until the age of 75 + when rates also rise sharply, and to a higher level than seen in men.

## Chapter 6: Mortality attributed to mental illness in West Norfolk, 2003-2011

- **Total number of deaths 2003-2011 in West Norfolk CCG due to mental health and behavioural disorders**

Between 2003 and 2011, there were **454 deaths** recorded due to a mental and behavioural disorder in West Norfolk CCG. This gives an average of **50 deaths** per year not including suicides. The most common cause was **dementia in older people**, but in **younger age groups substance misuse was the predominant** cause.

	Age band				%	
	0-34	35-64	65-74	75+	Total	Total

<b>Total</b>	6	10	15	423	454	

## Chapter 7: Suicide and injury undetermined

- **Total number of deaths from suicide and injury undetermined by CCG for NHS Norfolk and Waveney, 2003-2011**

Data from the Office for National Statistics show deaths due to suicide or injury undetermined by year. Across West Norfolk between the years 2003 and 2011, the highest number, **18**, occurred in years 2004, and the lowest, **7**, was seen in 2009. Over the 9 year period, the average number of deaths from suicide and injury undetermined is **13**. The long term trend has been a reducing rate, but this may have now reached a plateau.

	GY&W	North	Norwich	South	West	Missing	Norfolk and Waveney
2003	13	15	20	14	12	7	81
2004	26	15	24	23	18	5	111
2005	20	15	17	19	17	4	92
2006	20	6	17	14	14	5	76

## Chapter 8: Dementia

- **GP practice dementia register sizes compared to numbers of dementia sufferers identified by the Dementia Calculator by CCG, 2010/11**

Using the NHS tool that has been recently published to estimate true dementia prevalence in England, including those still undiagnosed by their GP, it was estimated that in 2010/11, there were **2,769** sufferers in West Norfolk CCG. Of these, **816** would have been living in residential care, and **1,953** in the community. Data from our GP registers however, document only 926 diagnosed cases in total (around **1,843** cases undiagnosed).

					Using Adjusted NDPR* & Residential care		
	Total population	% of list at 65+ years	Practice dementia register	Using NDPR *	Living in the community	Living in Residential Care	Total
<b>GY&amp;W</b>	230,813	22%	1,864	3,686	2,592	1,021	3,613
<b>North</b>	166,958	26%	1,335	3,205	2,250	1,022	3,272

<b>South</b>	217,820	21%	1,393	3,235	2,284	1,045	3,329
<b>West</b>	<b>162,989</b>	<b>24%</b>	<b>926</b>	<b>2,771</b>	<b>1,953</b>	<b>816</b>	<b>2,769</b>
<b>NHS N&amp;W</b>	981,069	22%	6,561	15,522	10,912	4,547	15,459

## Chapter 8: Dementia (cont.)

- The estimated number of dementia severity by CCG using the national estimate calculator tool for dementia, 2010/11

The expected number of people with dementia at different levels of severity. Of the **2,769** people in total, **1,521** had mild dementia **899** moderate, and **349** severe for West Norfolk CCG. It is likely that it is these moderate and severe cases that are captured on GP dementia registers.

	Mild	Moderate	Severe	Total
GY&W	1,983	1,174	455	3,613
North	1,794	1,062	416	3,272
Norwich	1,356	806	314	2,476
South	1,828	1,082	419	3,329
<b>West</b>	<b>1,521</b>	<b>899</b>	<b>349</b>	<b>2,769</b>
Norfolk and Waveney	8,482	5,023	1,953	15,459

- West Norfolk CCG projected and resulting dementia estimates (based on current diagnosis rate) 2011/12 - 2015/16

show the projected estimated figures for dementia within West Norfolk CCG from 2011/12 until 2015/16 and comparing it with GP practice QOF registers applying the current rate of diagnosis for each CCG on the projected number of people registered by each CCG.

	2011/12	2012/13	2013/14	2014/15	2015/16	% diagnosis rate
<b>West</b>						
Current dementia register	926	950	972	993	1,013	<b>33.40%</b>
Projected cases	2,769	2,841	2,907	2,968	3,029	
Undiagnosed cases	<b>1,843</b>	1,891	1,935			

## Chapter 10: Populations where potential inequity may be present

- **Prison**
- **Economic Migrants:** The potential has been noted here that people in these communities may be unaware of services, or how to access them even though rates of mental illness are likely to be fairly high in these groups.
- **Asylum seekers and Refugees:** People in these communities are also acknowledged to be at a higher risk of mental illness and services should ensure they are suitable for individuals who stand to benefit from them.
- **People with sensory impairment**
- **Homeless people:** Homelessness can be both a cause and a consequence of mental illness and services and approaches need to be tailored accordingly. Addressing homelessness as part of recovery from mental illness is a key part of current mental health strategies.
- **Lesbian, gay and bisexual populations:** Possibly less than 1% of the population of the East of England reports being lesbian, gay or bisexual, but the Integrated Household Survey April 2010 to March 2011 shows that they are at higher risk of experiencing mental health problems than society in general.

## Chapter 10: Populations where potential inequity may be present (1. Gypsy travellers )

- Research suggests that rates of anxiety and depression amongst gypsy travellers may be as much as **35%**.
- Office for National Statistics based on 2011 census records **255** Gypsy or Irish Traveller adults settled in West Norfolk
- One would expect 89 travellers with anxiety or depression if the research rates applied on the ONS gypsy travellers in West Norfolk.

	Gypsy or Irish Traveller	Potential number with anxiety or depression (35%)
Breckland	204	71
Broadland	44	15
Great Yarmouth	63	22
<b>King's Lynn and West Norfolk</b>	<b>255</b>	<b>89</b>
North Norfolk	46	16
Norwich	127	44
South Norfolk	183	64
Waveney	91	32
Norfolk	922	323
Norfolk and Waveney	1,013	355

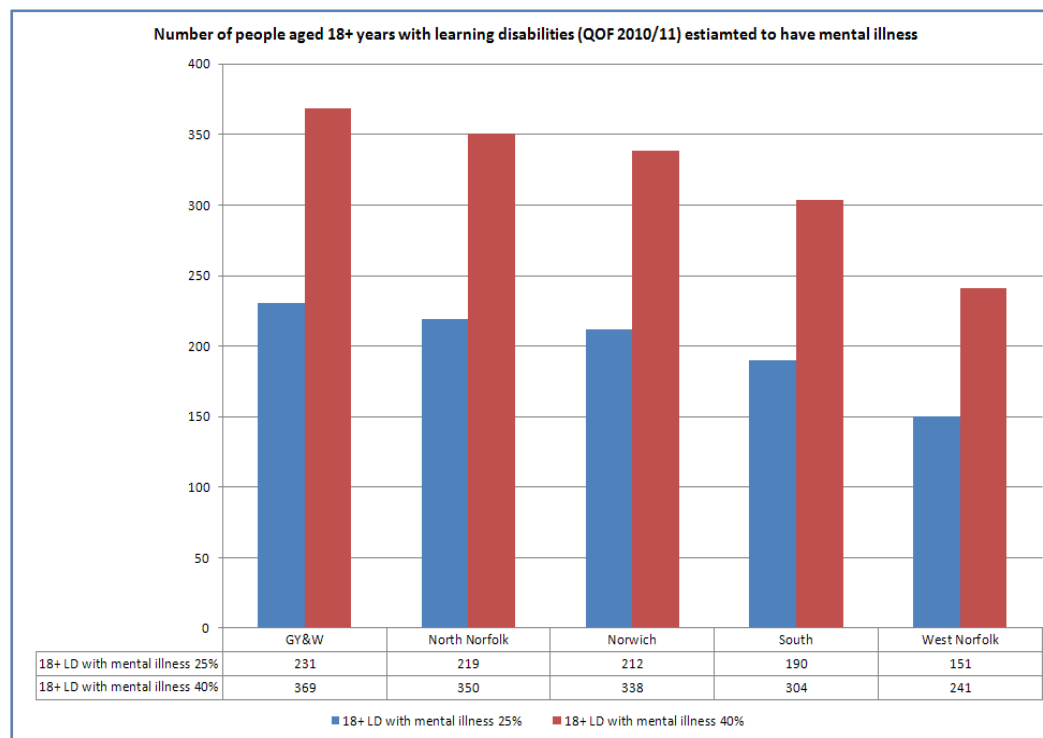

## Chapter 10: Populations where potential inequity may be present (2. Women with Postnatal mental illness)

- In 2011, there were **1,571** births in King's Lynn and West Norfolk.
- Applying published rates of postnatal depression, it is anticipated that between **157** and **236** mothers would have been affected, underlining the need for vigilant general health services, and mental health services that are appropriate for this client group.

	Number of births	Estimated numbers of women with postnatal depression	
		10%	15%
Breckland	1484	148	223
Broadland	1153	115	173
Great Yarmouth	1109	111	166
<b>King's Lynn and West Norfolk</b>	<b>1571</b>	<b>157</b>	<b>236</b>

Missing NHS GY&W	3	0	0
NHS Norfolk	8,271	827	1,241
NHS GY&W	2,362	236	354
NHS Norfolk and Waveney	10,633	1,063	1,595

## Chapter 10: Populations where potential inequity may be present (3. People with learning disabilities)

- Applying to the local numbers of people on the GP learning disabilities registers in 2010/11, published estimates of between **25%** and **40%** of people aged 18+ with learning disability also having a mental illness, there were between a **151** and **241** people in West Norfolk affected. Service providers require the capacity and specialist skills to deal with this need.

## Chapter 10: Populations where potential inequity may be present (4. Black Minority Ethnic Groups BME)

- There is research evidence that patterns of mental illness can be different in BME communities, but it is unclear how this would translate to local populations and groups. Cultural issues can affect access and experience of care.

	Irish	Chinese	Caribbean	Indian or British Indian, Pakistani, Bangladeshi, and Other Asian	White	All
Breckland	602	202	235	504	119,083	130,491

## Chapter 10: Populations where potential inequity may be present (5. Carers)

- One in 10 people provide unpaid care to family friends or neighbours with long term physical or mental illness, and 3% provide this for more than 50h per week. Nearly a third of young carers care for someone with a mental illness. Carers themselves are at risk of developing mental health problems.

Number of carers across Norfolk and Waveney, census data 2011 (Office for National Statistics ONS)

	Persons / numbers					
	All Usual Residents	Provides Unpaid Care	Provides 1 to 19 Hours Unpaid Care a Week	Provides 20 to 49 Hours Unpaid Care a Week	Provides 50 or More Hours Unpaid Care a Week	Provides 1-50 or More Hours Unpaid Care a Week

# Chapter 11: Programme Budgeting and Outcomes (cont.)

Spend and Outcome for West Norfolk CCG relative to other CCGs in England (Mortality from suicide and injury undetermined)

Spend and Outcome for West Norfolk CCG relative to other CCGs in England (Patients on enhanced CPA receiving early follow up)

## Next steps

- Further work should be undertaken, in collaboration with commissioners e.g.
  - to compare data between different chapters of this report, and other further analysis
  - to include further data sources, e.g. prescription data and data used in commissioning and providing CAMHS services
  - to consolidate latest evidence of best practice for different mental health pathways, including literature review
  - to identify other geographical areas with better outcomes in relation to their local population needs - exploring their local services and pathways
  - to agree and commission specific local data collection projects, e.g. surveys and service user views.
- To agree on best ways to present data to inform commissioning decisions for future commissioning configurations.
- To develop our knowledge and information on IAPT and assess to what extent it reflects population need.
- To make recommendations on future data collections that will better inform future needs analysis work e.g. to identify the real rates of illness within a particular population group locally against published national average rates.
